EDUCATION

Emory University

Bachelor of Science in Computer Science, GPA: 3.98

Atlanta, GA

Aug. 2023 – May 2027

Emory Oxford College

Associate's in Liberal Arts, GPA: 4.0

Oxford, GA

Aug. 2023 – Dec. 2024

LEADERSHIP

Emory Hacks | Co-Founder, Senior Hackathon Director

May 2025 – Present

- Co-Found and Direct the primary computer science-centered hackathon at Emory University, leading a cross-functional team of 20+ members in marketing, operations, and technology
- Develop a comprehensive, systematic road map for fundraising, social media marketing, and outreach with industry leaders in technology and business
- Increase hackathon funding by 30% by securing \$10k from various sponsors
- Improve hackathon participant engagement by increasing registration rate and projected attendance by 200%
- Organize day-of operations across 36 hours to curate a smooth and effective hackathon by managing volunteers and communicating with participants, judges, speakers, mentors, and advisors
- Project-managed a team to build an iOS app that powered day-of communications for 150+ hackathon attendees

PROJECTEmory | Co-President

May 2026 – Present

- Led a 15+ member team across 3+ cross-functional projects spanning research and software development
- Directly mentor and develop multi-track curriculum for CS students in SWE, PM, and product design positions on topics like Git, Jira, testing, and UI/UX Design

EXPERIENCE

Emory Embodied Interaction Lab

Aug. 2025 – Present

Human-Computer Interaction Research Assistant

Atlanta, GA

- Independently led HCI research investigating development of crochet pattern literacy and augmentation of eco-conscious craft practices under Dr. Kristin Williams, architecting and developing a full-stack, craft-based application using the MERN stack
- Contributed to research on waste-wood upcycling for woodworkers by training and iterating on machine learning models to classify wood defects, applying computer vision and image segmentation techniques
- Designed and fabricated functional prototypes through hands-on physical computing, including hardware integration, laser cutting, and CAD modeling

National Science Foundation

May 2025 – July 2025

Research Experiences for Undergraduates (REU) Research Assistant

Starkville, MS

- Selected for a 10-week REU program (5% acceptance rate nationwide) under the mentorship of Dr. Jingdao Chen
- Conducted rigorous research on segmentation models and vision-language navigation (VLN) for developing real-time, instance-aware Vision Language Maps
- Evaluated Segment Anything Model (SAM), Grounded SAM, and the You Only Look Once (YOLO) models for speed, accuracy, and cybersecurity performance on the ConSLAM dataset and hand-compiled datasets using the GHOST Vision 60 Robot
- Improve research efficiency and rigor by 75% by collaborating closely with team members and exercising interpersonal and cross-disciplinary communication skills
- Presented findings via poster and oral explanation at the Mississippi State University Summer Research Symposium, featuring 150+ presentations and 300+ attendees

TECHNICAL SKILLS

Relevant Coursework: Data Visualization, NLP & Computational Linguistics, Machine Learning, Database Systems, Physical Computing, Data Structures and Algorithms, Analysis of Algorithms

Project Management & Tools: Jira, GitHub Projects, Git, VS Code, Eclipse, Slack, Google Cloud Platform (GCP), Google Suite, Microsoft Office, Figma, Autodesk Fusion

Languages: Python, Java, SQL, JavaScript, C/C++, HTML/CSS

Web, Data & ML: Node.js, Express.js, React.js, MongoDB, pandas, NumPy, Matplotlib, PyTorch, OpenCV, D3

Design & Other: Rock Climbing, Graphic Design, Sewing/Garment-Making, Fiber Arts, Electric Bass Guitar
